

SECURITHERM EP BIOSAFE MINI BASIN MIXER

2621EP: a singular design to meet multiple demands

Ref. 2621EP

Anti-scalding safety

Hygiene and infection control

BIOSAFE spout outlet

Thermal shock feature

The SECURITHERM EP BIOSAFE mixer complements the existing BIOSAFE mixer range which previously won the German Design Award. The 2621EP, meets all the problems faced by healthcare patients and care home residents: comfort, total safety, hygiene and infection control.

SECURITHERM: total anti-scalding safety

As with all SECURITHERM EP mixers, the 2621EP mixer is fitted with a maximum temperature limiter and a pressure balancing (EP) cartridge. This EP technology compensates for the inevitable pressure variations in the system ensuring a stable water temperature at the outlet. It also provides automatic anti-scalding safety; if the cold water supply fails the hot water flow is reduced, preventing any risk of scalding to the user.

The mixer also benefits from Securitouch technology. The body and mechanism of the 2621EP mixer have thermal insulation which ensures that there are no hot spots for the user.

The 2621EP is the only mechanical mixer which allows thermal shocks at the temperature of the hot water in the system without removing the control lever or shutting off the cold water supply. To override the temperature limiter, simply press the red button located behind the control lever.

Water savings

Fitted with a flow rate limiter, the 2621EP mixer significantly reduces water consumption while guaranteeing optimum comfort for the user.

BIOSAFE: infection control

The unique design of the 2621EP mixer reduces the volume of water in the body considerably (Ø 35mm cartridge, lack of spout, etc.) and also bacterial proliferation.

This, combined with narrower water passages, means that water flows at a higher velocity, helping to control biofilm.

The BIOSAFE outlet is integrated directly into the mixer body. Made from Hostaform®, its smooth internal surface provides nowhere for dirt or scale to adhere, reducing the emergence and spread of bacteria and germs in damp conditions.

DELABIE has also taken into account the European drinking water directive by designing mixers and taps which do not come into contact with chrome, nickel and lead, so the water delivered is safe and wholesome.

Modern design

The sleek lines of this mixer with no spout create a contemporary design without neglecting user comfort. The simple shape of the mixer reduces the build-up of dirt and facilitates cleaning, the fundamentals of hygiene.

PRODUCT BRIEF / SECURITHERM EP BIOSAFE MINI BASIN MIXER

2621EP: The BIOSAFE basin mixer latest arrival

The 2621EP BIOSAFE basin mixer meets all the problems faced by healthcare patients and care home residents. Featuring SECURITHERM EP pressure-balancing technology, it guarantees optimum comfort and safety for the user. Due to its unique design, very low water volume in the body, integral BIOSAFE outlet, etc., this new generation of BIOSAFE mixer reduces the risk of bacterial development considerably. Available as a mixer with or without pop-up waste and with a standard or pressure-balancing cartridge. 10-year warranty.
