

2640 MECHANICAL BASIN MIXER

The only wall-mounted sequential mixer which allows thermal shocks without removing the control lever

Sequential open and closing

Very low volume of standing water

Thermal shock function

Improved ergonomics and functionality

Ref. 2640

TECHNOLOGY AND FUNCTIONALITY AT THE SERVICE OF HEALTHCARE FACILITIES

The mixers installed in the technical areas of health facilities must respond to the constraints encountered every day: controlling bacterial proliferation, anti-scalding safety and ergonomics to ensure the well-being and comfort of users. DELABIE offers a new wall-mounted sequential basin mixer designed to meet these different needs.

Technology and functionality

DELABIE's new wall-mounted 2640 mixer is perfectly suited to the medical environment.

The mechanical sequential cartridge opens the flow and adjusts the temperature with a single lateral movement over a range of 70°.

Opening with cold water, without any passage of hot water, ensures the supply of only cold water if required.

Anti-scalding safety

The 2640 sequential mixer opens and closes with cold water for increased anti-scalding safety. It is equipped with a pre-set maximum temperature limiter to prevent the risk of scalding.

By design, the body of the new wall-mounted sequential mixer has thermal insulation: hot water flows from the inlets to the cartridge inside narrow tubes and is, therefore, never in contact with the mixer's walls. Any risk of scalding and burning is removed.

Thermal shocks are possible thanks to a red button behind the mixer's control lever. Simply press this red button to override the temperature limiter and achieve the maximum temperature of the water in the system.

Maximum hygiene

DELABIE's 2640 sequential mixer has been designed to reduce the volume of standing water in the body: fewer components are in contact with the water, limiting biofilm attachment.

Moreover, its design prevents the water from coming into contact with chrome, nickel or lead. Therefore, the water delivered is safer and purer.

This mixer is fitted with a BIOSAFE outlet, made from Hostaform®, which allows a comfortable passage of water without retaining scale or impurities, reducing the risk of bacterial contamination.

Comfort and ergonomics

Opening and adjusting the temperature with just one lateral movement make these mixers very ergonomic.

The Hygiene control lever enables control without manual contact using the wrist, forearm or elbow. The increased spout length guarantees optimised hand washing. The swivelling spout can be fixed in place easily by tightening the screw at the rear of the spout.

PRODUCT BRIEF / 2640 MECHANICAL BASIN MIXER

The only wall-mounted sequential mixer which allows thermal shocks without removing the control lever

DELABIE's 2640 sequential basin mixer responds perfectly to the constraints encountered in the technical areas in healthcare facilities. Its design allows only cold water to be delivered if required, and thermal shocks can be undertaken at the temperature of the hot water in the system without shutting off the cold water or removing the control lever. Moreover, user safety is guaranteed: the mixer is supplied with a pre-set maximum temperature limiter. Equipped with a sequential cartridge, the mixer opens and closes with a single movement for improved ergonomics. 10-year warranty.

DELABIE, manufacturer's expertise

DELABIE, a 100% family-owned French company, founded in 1928, is the European market leader in water controls and sanitary equipment for public and commercial places. The company offers five product ranges specifically for this market: Commercial water controls, Hospital water controls, Accessibility and Hygienic accessories, Stainless steel sanitary ware and Specialist water controls.

Over 3,000 DELABIE manufactured items, including international references, are exported from its factory in France to more than 90 countries.

The company has 8 subsidiaries worldwide: Germany, Benelux, United Kingdom, Spain, Portugal, Poland, United Arab Emirates (Dubai) and China (Hong-Kong).
