

**ALGUI STAINLESS STEEL COUNTERTOP WASHBASIN**

Designer stainless steel washbasin for top-of-the-range washrooms

Design

Easy to clean

Ref. 120112

DELABIE's stainless steel ALGUI washbasin is not just a countertop washbasin. It is a truly decorative element designed to enhance the toilets in public and commercial places such as museums or shopping centres. Its dual finish, the interior of the basin has a bright polished finish and the outside has a polished satin finish, gives the product a particular brightness and an elegant appearance.

304 stainless steel is a lightweight, unbreakable material that is vandal-resistant and easy to clean. Since it is 100% recyclable, it contributes to sustainable development and protecting the environment.

We are used to seeing "white" products in public and commercial places (ceramic or composite materials) and thinking about stainless steel for squat toilets or the secure sector (combi products for prisons). Stainless steel has finally emerged as an interesting alternative to enhance those places where it is installed (toilets in restaurants or hotels, etc.).

It is an aesthetic material that matches any design and every colour.

**WINNING PRODUCT**

DELABIE's ALGUI stainless steel washbasin with a dual finish has received a "Special Mention" in the 2019 German Design Awards in the category "Bath & Wellness".

The German Design Award, conferred by the jury of experts at the German Design Council (Rat für Formgebung), is one of the most prestigious design competitions in the world and enjoys a reputation which extends well beyond specialist circles.

Every year the candidates for product design and communication are carefully selected and awarded for their individual, innovative contribution to the evolution of the international design landscape.
