

## 2020/2021 PLUS X AWARD: 4 QUALITY LABELS FOR THE BE-LINE® DROP-DOWN SUPPORT RAIL

DESIGN UP FOR GRABS!

**DELABIE's Be-Line® drop-down support rail (references 511964C, 511964W, 511960C & 511960W) has won the 2020/2021 PLUS X AWARD with 4 quality labels: High quality, Comfort, Ergonomics and Functionality.**

### The Award

The PLUS X AWARD is the world's largest innovation award for technology, sports and lifestyle. It recognises brands for the quality and innovation of their products. The jury, made up of independent experts who represent different sectors of activity, award the innovation award's quality labels: Innovation, Design, High quality, Ease-of-use, Functionality, Ergonomics and Ecology.

The PLUS X AWARD's approach is unique. The PLUS X AWARDS are a reference for the best products and an undeniable sign of the quality of a brand.

### The Product

Combining aesthetics and comfort, the new Be-Line® drop-down support rail won over the jury. The innovative design of the Be-Line® grab bars eliminates the medical aspects of accessible bathrooms and toilets, leaving only a feeling of well-being and living well, free from any complex, both at home and in the wider environment.

Drop-down support rails are typically stigmatising. The Be-Line® drop-down support rail is discreet, with clean lines. It integrates naturally with its environment and with all interior decorative styles. In the lowered position, with its rounded profile and ergonomic, flat surface on top that prevents rotation, it is a valuable aid for senior citizens and people with reduced mobility.

Taking up minimal space in the raised position, it is ideal for showers and toilets that are used by a variety of users. The Be-Line® drop-down support rail subscribes to the school of design for all. It's suitable for any user.

The Be-Line® drop-down support rail is also removable. It can be replaced by a cover plate. This reduces the number of drop-down rails in a facility, allowing installation only when required. As with all of DELABIE's Accessibility products, the Be-Line® support rail benefits from the Safety Pack: 10-year warranty, CE mark and tested to over 200kg. In public and commercial places, the user weight is unknown. The products installed must, therefore, be able to support any user.

Available in two powder-coated aluminium finishes - matte white or metallised anthracite - Be-Line® ensures a good visual contrast between the colour of the support rails and the wall.
