

CROSS WALL TIME FLOW WATER CONTROLS

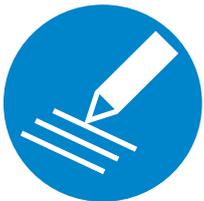

A complete range which combines security and design

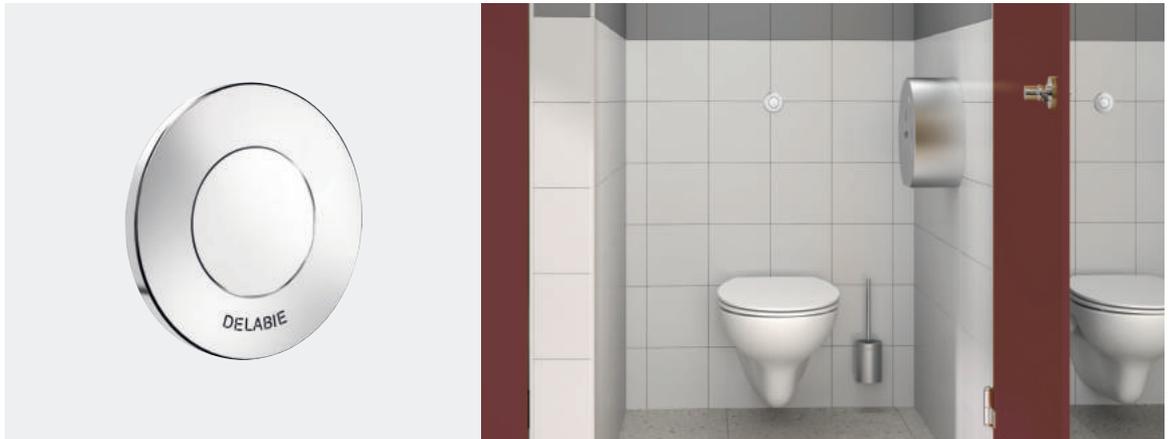

Vandal-resistant

Water savings

Design

TEMPOFLUX WC direct flush valve, ref 761110

DELABIE has given its TEMPOSTOP, TEMPOFLUX and TEMPOCHASSE range of cross wall self-closing taps and flush valves a make-over to offer products that are more vandal resistant and more aesthetic.

Installation and maintenance

Water controls for installation through the wall have been specifically designed for places with a high risk of vandalism, such as prisons, service stations, certain schools and colleges, etc.

The objective is to prevent the user gaining access to the operating components by installing the water controls through the wall in a service duct. All maintenance takes place behind the wall, in the service duct, making it easier and safer for the maintenance staff to work.

Vandal resistance

These solutions have been designed to withstand intensive use and vandalism. The control button has a rod which can be cut to size to adjust to different wall thicknesses. Made entirely from aluminium, the rod is very resistant. The button is completely flush to the wall and it is also ligature resistant avoiding any risk of self-harm. It has rounded edges which also discourage removal, protecting the user from harming themselves.

Water savings

The shower and basin versions feature an anti-blocking system: the water only flows once the push-button is released. Added to this is a regulated flow rate and automatic shut-off, providing up to 85% water savings on some models. So, this DELABIE equipment prevents any excessive consumption in those facilities that accommodate people predisposed to vandalism.

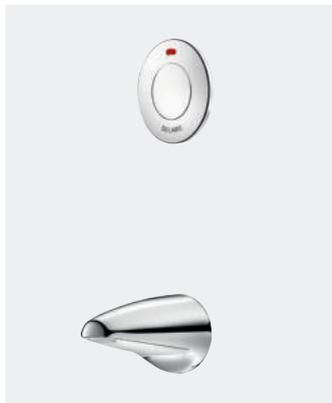

Design

With a choice of sleek and very modern designs, DELABIE can equip an entire washroom facility in the secure sector. These water controls for washbasins, showers, urinals and WCs meet the challenges of security and water saving without neglecting the design.

PRODUCT BRIEF/ CROSS WALL TIME FLOW WATER CONTROLS RANGE

DELABIE's new range of cross wall time flow water controls combines security, water savings and design. These products, intended for places at high risk of vandalism, ensure the total safety of the user and maintenance staff. The anti-blocking system ensures water flows only when the push-button is released to avoid any waste of water. 10-year warranty.
