

OUTDOOR TIME FLOW SHOWER COLUMN

Effortless: design, savings and sturdiness

Water savings

Comfort

Vandal-resistance

Easy to install

OUTDOOR: the new time flow shower column from DELABIE.

Available in several versions, it adapts to every need.

Ecological, economical and durable, it guarantees comfort for all.

A product that adapts to everyone's needs

The OUTDOOR shower column is available in 5 versions: 1 shower, 1 shower and 1 foot-rinse, 2 showers, 2 showers and 1 foot-rinse or 4 showers. Therefore it can easily adapt to every need. Its sleek and elegant design blends in with any environment.

An economical and ecological solution

Its timing system gives it an ecological advantage, but also an economic one as it offers 80% water savings compared to a conventional shower system. The water flow rate is controlled and regulated at 6 lpm. In comparison, the flow rate of a conventional shower equates to 15 lpm, or more than double. Finally, a constant flow rate is guaranteed, regardless of pressure variations in the system, to preserve the user's comfort.

Comfort for all

The push-button requires half the pressure to operate compared to a conventional shower, so it is much easier to operate, especially for children, the elderly and/or those with reduced mobility.

Easy to install and maintain

It is easy to install: the product is supplied "ready-to-install". Thanks to its access panel, located at the back of the column, maintenance is simple and efficient. In particular, it is possible to flush the pipework and/or shut-off the water to avoid seasonal issues, for example, especially in winter with the risk of frost. Finally, its streamlined design makes it quick and easy to clean.

Durability without fail

The OUTDOOR shower column has also been designed to meet another challenge: resistance to all kinds of vandalism and intensive use. This is why DELABIE chose anodised anti-corrosion aluminium for the column, and chrome-plated brass for the valve and shower head. The combination of these two materials gives this product lasting resistance against any act of vandalism, and it will not deteriorate over time. Its proven technology also guarantees durable and reliable time flow - 30 seconds for the shower and 7 seconds for the foot-rinse, as well as an ability to withstand over 500,000 operations.
