

SPORTING MIX 2 SECURITHERM ELECTRONIC SHOWER PANEL

A simple and aesthetic anti-legionella solution

Hygiene and controlling bacterial proliferation

Anti-scalding safety

Stable temperatures

80% water savings

DELABIE has unveiled its new electronic and thermostatic shower panel: SPORTING MIX 2 SECURITHERM.

Hygienic, safe and economical, it guarantees optimal comfort.

Impeccable hygiene

Thanks to electronic technology, the SPORTING MIX 2 SECURITHERM operates without the need for manual contact, avoiding the spread of germs. The flow opens and closes when hands are waved in front of the sensor. Every 24 hours after the last use, a ~60 second rinse takes place to flush the water system. This flush helps to fight against bacterial proliferation that occurs when water stagnates in the pipework. Its scale-resistant shower head reinforces its hygienic nature.

A solution to prevent legionella

Legionella bacteria develop in stagnant water that is between 25 and 45°C. To prevent their development, water should be mixed to a safe temperature at the point-of-use (Health and Safety Executive guidelines HSG 274 Part 2, 2014). SPORTING MIX 2 is an ideal solution: the shower panel is supplied directly with hot water at above 50°C and cold water from the system. The thermostatic mixer integrated in the shower head adjusts the water to 38°C and delivers it immediately. There is no mixed water between the circulating loop and the point-of-use, nor any standing water in the shower panel.

Optimal anti-scalding safety

SECURITHERM technology ensures user safety. It eradicates the risk of scalding thanks to the thermostatic mixing valve integrated in the shower head on the panel. If the cold water supply fails, it shuts off automatically so that no scalding water can be delivered. The mixed water temperature can be pre-set by the installer.

Comfort for all

A stable temperature is guaranteed regardless of pressure variations in the system, to ensure user comfort. The failsafe function also prevents cold showers, ensuring automatic shut-off if the hot water fails. DELABIE also offers a version with a comfort shower head with rain effect (DP).

Installation and maintenance suitable for all installation configurations

This shower panel has also been designed to simplify installation, and is available in several versions: with exposed water inlets, for installation in front of the wall, from above; or recessed water inlets for connection from behind the wall (from above or below). Maintenance is also simplified, with direct access to filters and non-return valves. The stopcocks are integrated.

An economic and ecological solution

SPORTING MIX 2 offers 80% water savings compared to a conventional shower. The flow of water can be interrupted at any time by the user by waving their hand in front of the sensor. If the user forgets to shut off the flow, a safety timer shuts off the water after 60 seconds, which avoids the risk of waste. Finally, the water flow rate is controlled and pre-set at 6 lpm.

PRODUCT BRIEF/ SPORTING MIX 2 SECURITHERM

The SPORTING MIX 2 is completely hygienic: no manual contact, daily anti-bacterial duty flush. With SECURITHERM technology, the user benefits from total safety (anti-legionella solution, anti-scalding system) and optimal comfort. It comes in several versions to simplify installation, and to adapt easily to its environment. Economic and ecological, it can achieve 80% water savings and avoid any risk of waste.
