

THE BE-LINE® SHOWER SEAT WINS AN AWARD

Winner of the 2019 Remarkable Bathrooms Award

DELABIE's Be-Line® accessibility range has won a new award. The lift-up and removable Be-Line® shower seat is the winner of the 2019 "Remarkable Bathrooms Award" in the "Commercial" category.

The Award

The list of Remarkable Bathrooms prize winners was unveiled during the 3rd edition of the "General State of the Bathroom" event. This competition, organised by AFISB (French Association of Bathroom Industries), recognises bathroom products which demonstrate singular, innovative, relevant and functional characteristics, offering consumers a unique or distinctive experience.

The independent jury - comprising experts and key personalities from the housing sector, and chaired by the editor-in-chief of "Maison & Travaux" magazine, Céline Chahi Bechkri - awarded the Be-Line® shower seats the prize in the Commercial category.

The product

The Be-Line® range combines aesthetics and comfort. With its clean lines, this shower seat naturally integrates into its environment. It eliminates the medical and sometimes stigmatising aspects of accessible washrooms.

The Be-Line® shower seat subscribes to the school of design for all, and is suitable for all users, regardless of their age or degree of independence.

With its large width and depth, it represents a valuable support or simply additional comfort for the user. Lift-up and removable, it is ideally suited to the shared use of washrooms and showers. A shower shelf can be substituted for the seat to limit the number of shower seats in a building, allowing their installation only if necessary.

As with all DELABIE's Accessibility products, the Be-Line® shower seat benefits from the Safety Pack: 10-year warranty, CE marked and tested to over 200kg.

In public and commercial places the user weight is unknown. The products installed must therefore be able to support any user.
