

ZERO CONTACT: IT KNOWS HOW TO KEEP ITS DISTANCE!

BINOPTIC electronic soap dispenser

BINOPTIC electronic soap dispenser

BINOPTIC electronic tap

Ref. 512051P

The DELABIE Group, expert in hygienic accessories for public and commercial places has just extended its BINOPTIC range of mixers and taps with the new BINOPTIC electronic soap dispenser. This harmonious ensemble is 100% non-contact.

No contact, 100% hygiene

Hand washing is the basis of good hygiene and an effective measure against bacteria. Electronics reinforce this efficiency.

With the BINOPTIC soap dispenser, the hands are detected automatically by an infrared sensor. Setting the sensor distance ensures that there is no manual contact with the soap dispenser, avoiding any contamination by hand.

The BINOPTIC dispenser, partnered with DELABIE's BINOPTIC mixers and taps, offers the highest level of hand hygiene; 100% non-contact.

Design harmony

The new BINOPTIC electronic soap dispenser creates a harmonious whole with DELABIE's famous BINOPTIC taps. Because the washrooms often represent the image of the whole building, this dispenser brings the final design touch to public washrooms.

Liquid or foam?

At last - a single dispenser for liquid and foam soap! The BINOPTIC electronic dispenser is suitable for the two types of soap, and even for hydroalcoholic gel.

Moreover, the no waste, non-drip pump dispenser cannot be blocked, and it distributes the correct amount of soap per activation.

A clever tank

The tanks for soap dispensers are often installed in places that are difficult to access, for example, under the sink.

The unique clip-on system for the BINOPTIC electronic dispenser's tank has been cleverly designed to make it easy for the maintenance staff to use.

**PRODUCT BRIEF / BINOPTIC ELECTRONIC SOAP DISPENSER:
