

2023 GERMAN DESIGN AWARD WINNER: SPORTING 2 SECURITHERM ELECTRONIC SHOWER PANEL

A SIMPLE AND STYLISH SOLUTION TO LEGIONELLA

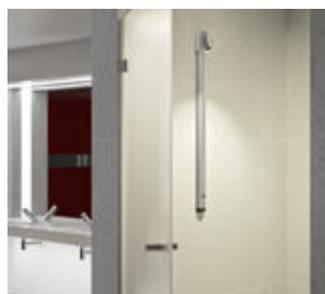

The **SPORTING 2 SECURITHERM** electronic shower panel (refs. **DELABIE 714900, 714906, 714910 and 714916**) has received **“SPECIAL MENTION”** at the **2023 GERMAN DESIGN AWARD**.

The Award

The GERMAN DESIGN AWARD, conferred by the jury of experts at the German Design Council (Rat für Formgebung), is one of the most prestigious design competitions in the world and enjoys a reputation which extends well beyond specialist circles.

Every year the candidates for product design and communication are carefully selected and awarded for their individual, innovative contribution to the evolution of the international design landscape.

The competition imposes extremely high criteria in the selection of its winners. Due to the unique nomination process, only products that rise clearly above the rest in terms of quality and design are invited to compete.

The Product

DELABIE turns the spotlight on its new **SPORTING 2 SECURITHERM** electronic and thermostatic shower panel - the latest addition to the range. It is hygienic, durable and economic, offering maximum comfort to the user.

The **SPORTING 2 SECURITHERM** shower panel guarantees impeccable hygiene. Its electronic technology requires no manual contact to operate, preventing the spread of germs. The water flow opens and closes when the hands are waved in front of the sensor. A true innovation in hygiene and safety.

The thermostatic technology is integrated within the head of the shower panel, as close as possible to the point-of-use. This means that no mixed water circulates within the panel. In addition, a duty flush of about 60 seconds, takes place every 24 hours after the last use to flush the system. Legionella develops between 25°C and 45°C, so this feature helps to fight against bacterial proliferation that occurs when water stagnates in the pipework.

DELABIE also ensures total anti-scalding safety for the user. If the cold water supply fails, the hot water shuts off automatically to prevent the risk of scalding.

Temperature stability is guaranteed regardless of pressure variations in the system thanks to the thermostatic technology. The maximum temperature is limited to 38°C, removing the risk of scalding. In addition to its hygiene and safety benefits, this shower panel is also an economical and ecologically sound investment.

SPORTING 2 SECURITHERM generates 80% potable water savings compared to a conventional shower thanks to its electronic system and pre-set flow rate of 6 lpm. The user can interrupt the water flow at any time by waving their hand in front of the sensor. If the user forgets, a safety timer shuts off the water after 60 seconds, which avoids the risk of waste.

The electronic **SPORTING 2 SECURITHERM** improves user comfort and is also available in a range of configurations which greatly increases ease of installation.
