

2021 iF DESIGN AWARD: THE AWARD-WINNING TEMPOMATIC MIX 4 ELECTRONIC MIXER IT COULDN'T BE CLEARER!

DELABIE's TEMPOMATIC MIX 4 electronic basin mixer with recessed inlets (references 493400, 493406, 493500 & 493506) has won a 2021 iF DESIGN AWARD in the *Product design - bathroom* category.

The award

For 67 years, the iF DESIGN AWARD has recognised exceptional design quality. The iF awards are associated with outstanding design services worldwide and are considered one of the most prestigious competitions worldwide.

This distinction is awarded to the best candidates in the following disciplines: product design, packaging design, communication design, architecture and interior design, professional concept, service design, user experience (UX) and user interface (UI). All the winning candidates can be found on <http://www.ifworlddesignguide.com>.

The product

DELABIE has extended its range of TEMPOMATIC 4 mixers and taps with wall-mounted battery-operated and mains versions for recessed installation. It is now possible to have a mixer without a recessing housing and without a wall plate.

Wall-mounted TEMPOMATIC 4 mixers and taps are available in different lengths, for different types of installation and with different power supplies. For installations that do not have rear access, DELABIE offers a technological innovation: versions with the water inlets recessed in the wall, with only one recessing channel required.

Installation is quick and easy without the need for a recessing housing. Maintenance is limited: technical elements can be accessed from the front, self-adjusting electronic system and economical.

TEMPOMATIC MIX 4 guarantees totally hygienic solutions for Public Places. There is no risk of spreading germs by hand, unlike with a traditional mixer or tap. The mixer starts and stops automatically without any manual contact. A daily flush of the pipework takes place every 24 hours after the last use to prevent any bacterial development. The user is, therefore, totally protected.

The flow rate is pre-set at 3 litres/minute. During soaping, TEMPOMATIC MIX 4 stops automatically, saving almost 5 litres of clean water with every hand-washing. Thanks to its electronic control and its reduced flow rate, TEMPOMATIC 4 can save up to 90% of the water bill - essential when there are a multitude of wash stations to fit-out or maintain.

Combining comfort and hygiene, the sleek design of the TEMPOMATIC MIX 4 meets the needs of public places and their users regardless of their level of independence.
