

TEMPOMATIC 4 ELECTRONIC URINAL VALVE

Aim true: new design

Design

Water savings

Easy to install

Hygiene and controlling bacterial proliferation

Ref. DELABIE: 4794 11

DELABIE's electronic urinal valve is completely hygienic. Intelligent and economical, it is also easy to install and maintain.

Urinals have many advantages, notably in terms of saving space, time and water. Two urinals can be installed in the same space as a single toilet. Since the user stands up to use a urinal, they take less time, allowing a quicker turnaround of users. Thanks to a smaller bowl size, a urinal uses six-times less water than a WC pan.

Often associated with bad smells, urinals suffer from a bad image. To avoid touching the control, users rarely push the button to flush the valve after use, which creates hygiene problems. Also, when the urinal is not used regularly, water stagnates in the pipe work and bacteria proliferate.

DELABIE has designed a product that rehabilitates urinals within buildings open to the public. The TEMPOMATIC 4 electronic urinal valve offers solutions to these problems.

Total hygiene

The urinal is rinsed automatically when the user leaves without the need for any action on their part. The lack of manual contact therefore prevents the spread of germs. The exposed TEMPOMATIC 4 activates automatically, every 24 hours after the last use, to circulate water in the system. This duty flush also renews the water in the trap. This acts as a natural barrier against rising bad smells.

Instant installation and accessible maintenance

Thanks to integrated batteries, the TEMPOMATIC 4 urinal valve is ideal for renovation. So, an electronic urinal valve can easily replace a time flow model without any additional structural work or wiring. The urinal valve works immediately, and will operate for 3 to 6 years. Maintenance is also simplified: the electronic unit, solenoid valve and batteries can be accessed from the front without removing the valve. The stopcock is also integrated.

Water and energy savings

The TEMPOMATIC 4 urinal valve offers three rinsing modes depending on the type of urinal used, to provide the best compromise between hygiene and water consumption. The high-frequency mode - exclusive to DELABIE - optimises consumption by adjusting the rinse volume during busy periods. These periods of intensive use occur during concert intervals, at half-time during sporting events or during school breaks, etc. The TEMPOMATIC 4 also provides energy savings thanks to infrared active pulse technology which consumes very little energy while optimising detection. Its battery works autonomously for 350,000 cycles, or for 3 to 6 years depending on the frequency of its use.

Considered design

On the design side, the TEMPOMATIC 4 exposed urinal valve has been completely modernised: more aesthetic, less bulky. Its clean lines subscribe to current styling. The valve has a one-piece body made from chrome plated metal, which adapts perfectly to the different ambiances of public buildings. Available in several versions, it is compatible with DELABIE's FINO and DELTA urinals.

PRODUCT BRIEF / TEMPOMATIC 4

TEMPOMATIC 4 is an exposed electronic urinal valve with integrated batteries. Its electronic technology makes it a completely hygienic solution, requiring no manual contact. Its high-frequency mode and 3 rinsing programmes optimise water consumption. It is easy to install and maintain, thanks to the accessible solenoid valve, stopcock and battery. 10-year warranty.

DELABIE, manufacturer's expertise

DELABIE, a 100% family-owned French company, founded in 1928, is the European market leader in water controls and sanitary equipment for public and commercial places. The company offers five product ranges specifically for this market: Commercial water controls, Hospital water controls, Accessibility and Hygienic accessories, Stainless steel sanitary ware and Specialist water controls.

Over 2,000 DELABIE manufactured items, including international references, are exported from its factory in France to more than 90 countries.

The company has 9 subsidiaries worldwide: Germany, Austria, Benelux, United Kingdom, Spain, Portugal, Poland, United Arab Emirates (Dubai) and China (Hong-Kong).
